

## **Sysmex signs government MOU to establish first Japanese diagnostic reagent factory in Saudi Arabia**

**Riyadh, Kingdom of Saudi Arabia, 25.12.2025** - Sysmex Healthcare Regional Headquarters announced that it has signed a Memorandum of Understanding (MOU) for the establishment of a diagnostic reagent factory in the Kingdom of Saudi Arabia, as well as the introduction of a logistics hub for the Middle East. This significant milestone marks a new chapter in the company's long-standing commitment to the Kingdom. It represents an additional investment in local manufacturing & logistics capabilities that will help create employment opportunities and bring advanced diagnostic products closer to the healthcare ecosystem of the region, while significantly reducing Sysmex's CO<sub>2</sub> emission. These initiatives will contribute to Saudi Arabia's Vision 2030 and Sysmex's Eco Vision 2033 goals.

Since entering the Kingdom, Sysmex has actively contributed to Saudi Arabia's healthcare ecosystem by delivering cutting-edge diagnostic solutions aligned with Saudi Arabia's Vision 2030 goals. These solutions enhance clinical decision-making, improve operational efficiency, and support better patient outcomes.

Sysmex served end-customers for several decades through local partners before establishing a direct affiliate in 2022, pioneering a direct business model that enabled closer collaboration with hospitals, laboratories, and healthcare authorities. Building on these foundations, Sysmex became one of the first Japanese companies across all sectors to establish a Regional Headquarters (RHQ) in Riyadh, demonstrating its commitment to the Kingdom.

In addition to the manufacturing & logistics initiatives mentioned above, the MOU also covers the deployment of a platform for local talent training, which will contribute to the know-how development of healthcare professionals in the country.

### **About Sysmex Europe SE**

Sysmex supports healthcare professionals and patients around the world with a broad range of medical diagnostics products and solutions in a variety of fields. With over 50 years' experience in in-vitro diagnostics, we are continuously developing our product and service portfolio to cover the entire patient pathway of care. Our multi-functional solutions work together with high-quality reagents and reliable customer care to create a better healthcare journey for all.

Sysmex Europe SE, located in Hamburg, Germany, is a subsidiary of the Sysmex Corporation from Kobe, Japan. From our Hamburg office, we serve our affiliates, distributors and customers throughout Europe, the Middle East, and Africa (EMEA).
